IK,,,,Multimedia,,,Â .Adult minifigures Contents The original minifigures, the 2007 minifigures (sometimes called the Original Minifigures), were introduced at Comic-Con on August 29, 2005. The first wave of minifigures consisted of two key sets, Pirates and Knights, with the main theme of the set being pirate or knight themed. Swedish LEGO model builder Christian Von Koenig, the Lego designer of the minifigures, stated that the initial minifigures would be enough for all buyers. Thus, the first minifigure releases were available for everyone to obtain, regardless of if they were pirate, knight, or common LEGO minifigures. Contents Until the release of the Bionicle sets in 2002 and the introduction of exclusive minifigures (in 2009) and only available at events, only the eight minifigures listed here were available. In all other years, the LEGO minifigures are available for purchase by adult collectors and serious builders, and the minifigures are distributed at retail. After that, the minifigures were given their own subcategory (e.g. the Knights category was used for the Knights sets while the Wings category was used for the Wind Raider sets and the set 20060-1701). However, "MOCs" or "Modular Constructions" (sets that don't have minifigures) can be found in most sets.at Well, these guys are doing something right. The last time I tried getting into one of their Field Packs, it took me about 30 minutes to figure out how

Why this guy's story is a bitter lesson to hackers - chromaton ===== justaman I disagree, and I feel it's a misleading title, because it intimates that he went and paid a ransom. There is nothing that could be more absurd than to pay a ransom, especially when the actual end result is less chance that you will be attacked again. Also, I don't feel that any lesson has been learned, unless somebody is going to tell the FBI about this, but I would think they would already have a handle on things. My feelings are, that people like this make public security harder. I would be concerned about telling all my private information to the FBI, especially given the fact that the FBI has been known to misappropriate that data in the past. I would hope a lesson has been learned, like that your life should not be made miserable because of the good intentions of some people. ~~~ bgray He says it's not only him. "I may well have scared off a few more." The point of the story was to be honest about being helpless against viruses. If you tell the truth about your lack of technical expertise and don't pretend that you could evade a virus when you really aren't in a position to do so, you give people a pretty darn good reason not to listen to you when you try to advise them. It also helps prevent you from getting entrenched in the "information bubble" of overestimating your own abilities. ----- jqm Well... the thing is if you don't realize you are being hacked and you decide to pay a ransom and then claim later that you believed the threat...well... it doesn't look so good. "I may well have scared off a few more." I think he is basically saying that he doesn't know... so it might be impossible to really tell. Maybe this guy is guilty of a crime? ----- webXL "I may well have scared off a few more" and lost "some respect" among his peers. I think those lessons were learned.
